RECOGNITION PROGRAM

FOR FOOD ESTABLISHMENTS IN MADISON AND DANE COUNTY, WI ONLY

Public Health – Madison and Dane County is excited to announce that food establishments can become eligible for community-wide recognition by participating in the **SAFE FOOD CREW** training program.

Promotional information about the **SAFE FOOD CREW** program will be targeted to the dining public and to those using retail food stores in Madison and Dane County. Regular press releases will be issued and media events will be organized until our community becomes familiar with the program. Additionally, food establishments that have successfully met the program criteria will be listed on our website: www.safefoodcrew.org.

And finally, successful participants will receive a 6” by 6” decal (sample below) with the identifiable logo, indicating your establishment has provided this training to your staff. This decal can then be posted in a visible spot in your establishment so your customers will become aware of your food safety training efforts.

Public Health – Madison and Dane County will recognize food establishments that meet the following criteria:

- The food establishment must complete at least 5 training modules in a 12-month period.
- At least 10% of food employees (or a minimum of up to 5, whichever is greater) must be trained per module.
- The establishment documents the training that was given and submits the approved tracking forms and Pre and Post quizzes to Public Health – Madison and Dane County for verification.
- The Application for **SAFE FOOD CREW** Public Recognition Program has been submitted to Public Health – Madison and Dane County.
