

Make it your **GOAL**

to have your pre-teen and teenager's vaccines up-to-date

Much like the pads and helmets protect us from serious injury, vaccines provide a defense to keep us healthy and active. Pre-teens and teenagers need immunizations to prevent serious diseases including meningitis, whooping cough, chicken pox, influenza and cervical cancer in females. Schedule an appointment now with your child's health care provider to get their immunizations up-to-date before school starts. Public Health provides immunizations free for uninsured children/teens.
