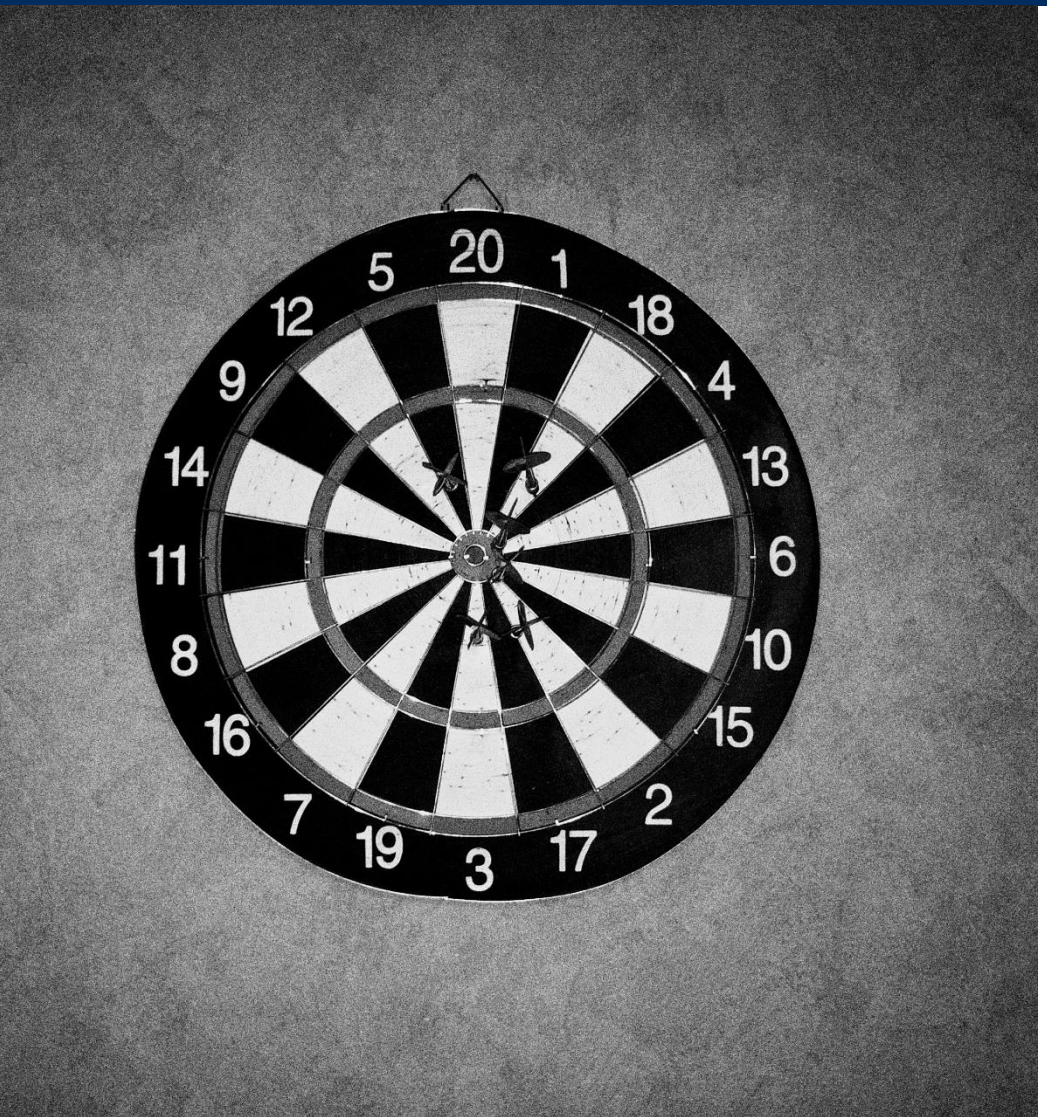
Data Update: What We'll Cover



Frame why we should care about data and how we might use it

Give an overview of current data

Highlight sources of violence-related data

Get feedback on data format and content to support your agency's and the coalition's work

Why should I care about data?

Roadmap: Understand Violence in Our Community through Data

Use timely, comprehensive data to prioritize and implement prevention efforts

Create data dissemination tools to aid in the understanding of violence data

Enhance and strengthen data about gun ownership, safety and use

How to use data to inform our work

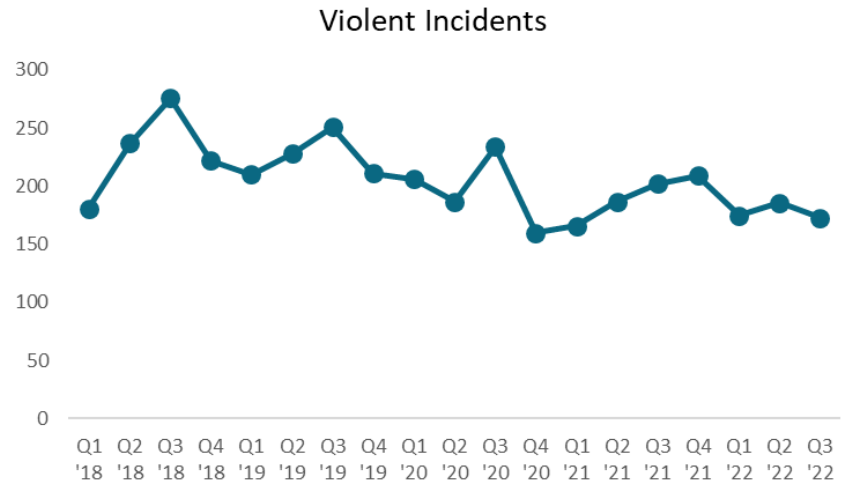
Understand magnitude of the issue and how it is changing over time

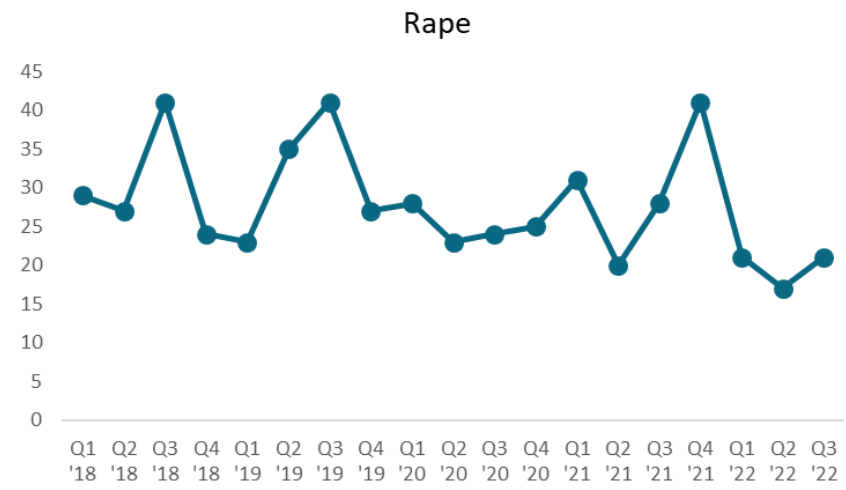
Apply for funding

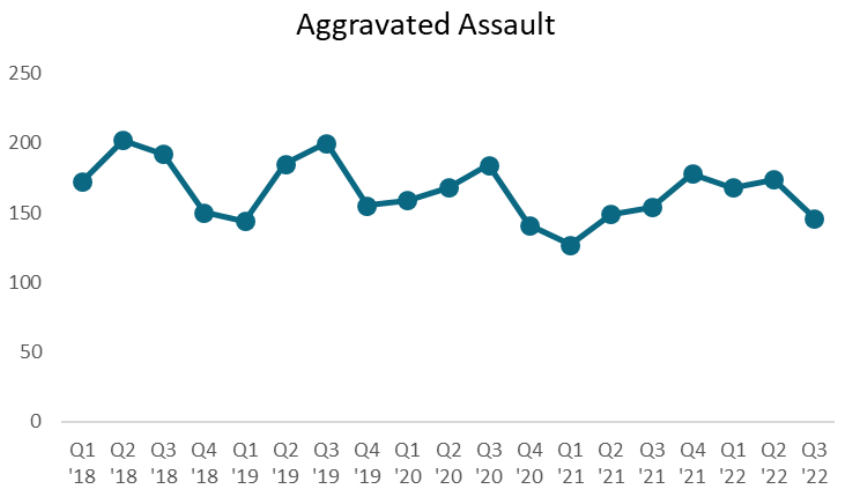
Develop and advocate for policy change

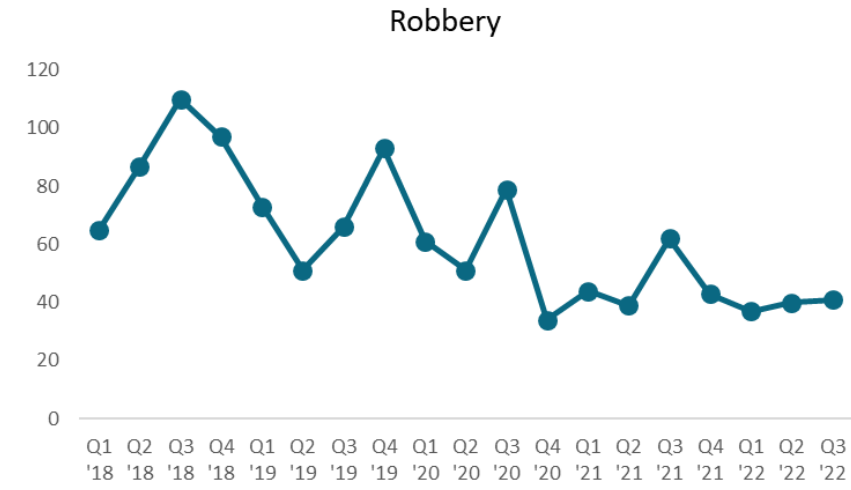
Adjust services (population, location, type)

The number of reported **violent incidents, rape and robbery** in Madison **have decreased** since 2018.



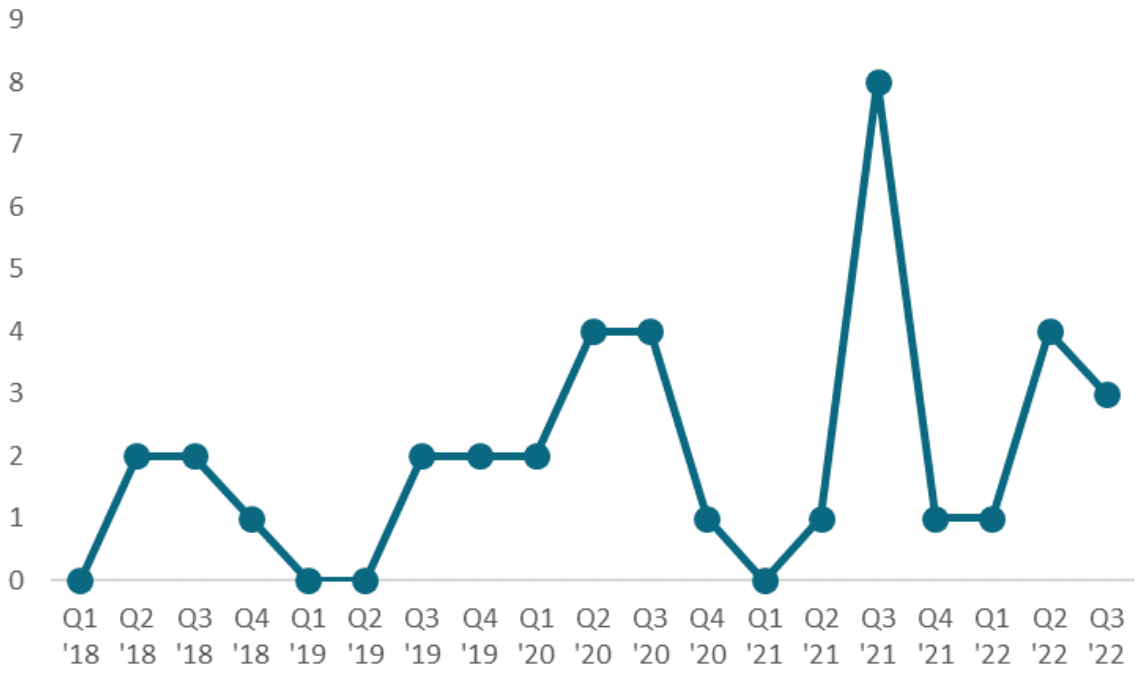






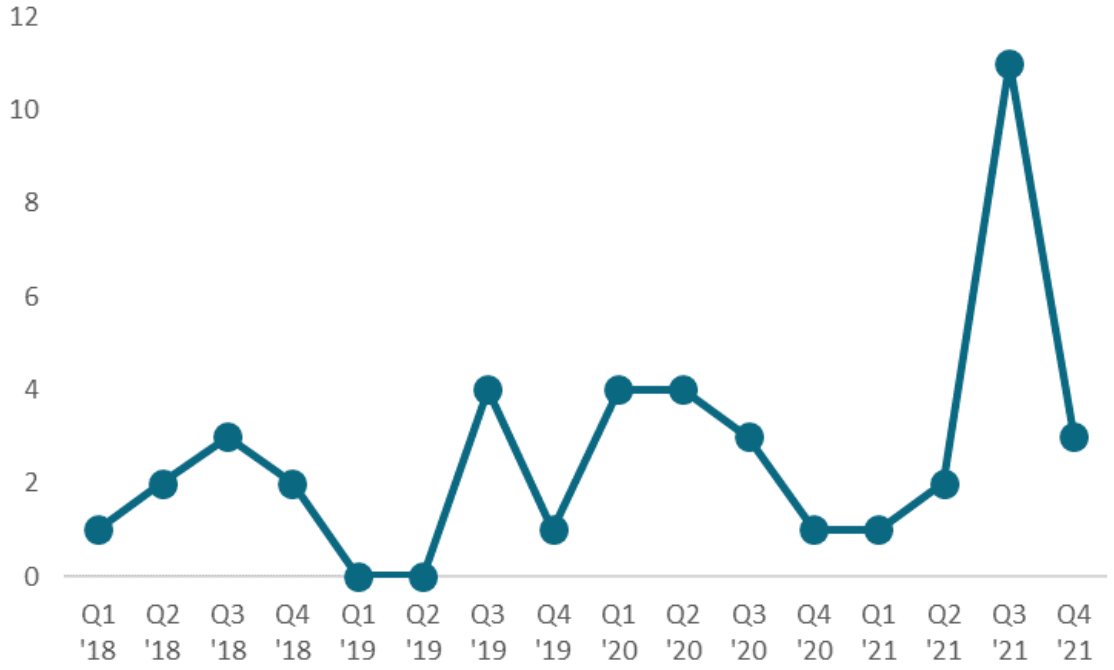
Source: Madison Police Department. Data from 2022 are provisional and may change as offenses are further investigated. Numbers may not match numbers reported by MPD due to counting Incidents or offenses.

The number of **homicides** in Madison **did not change significantly** from 2018 through Sep 2022



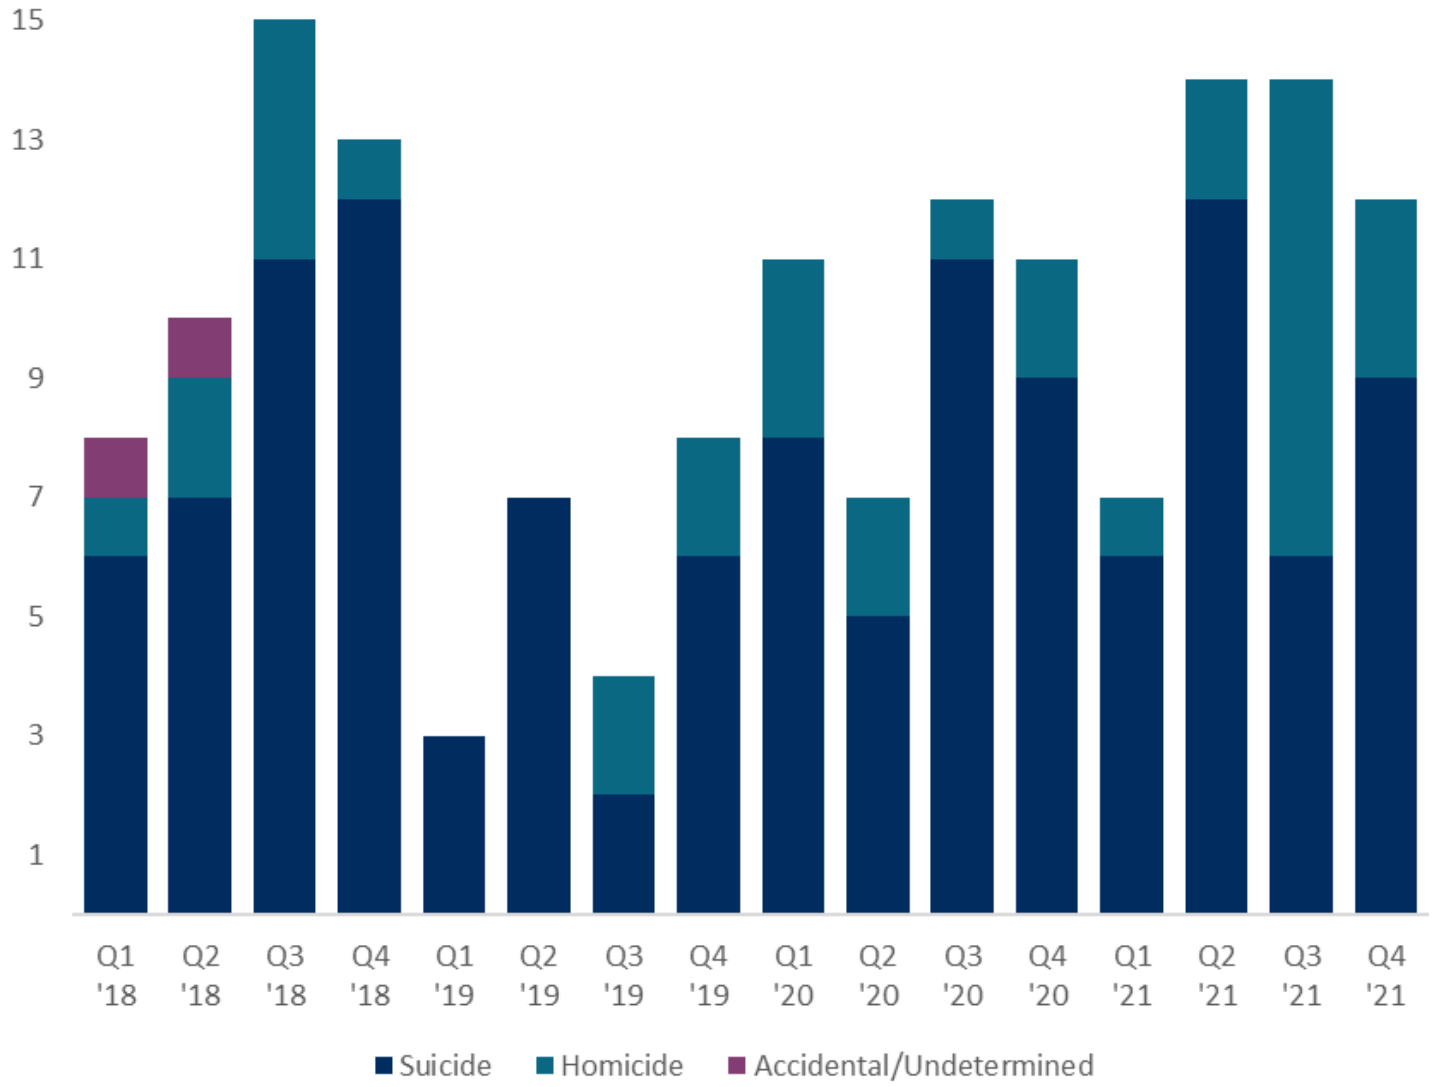
Source: Madison Police Department. Data from 2022 are provisional and may change as offenses are further investigated. Homicide excludes Negligent Manslaughter and homicides involving Law Enforcement.

The number of **homicides** in Dane County **increased** from 2018-2021



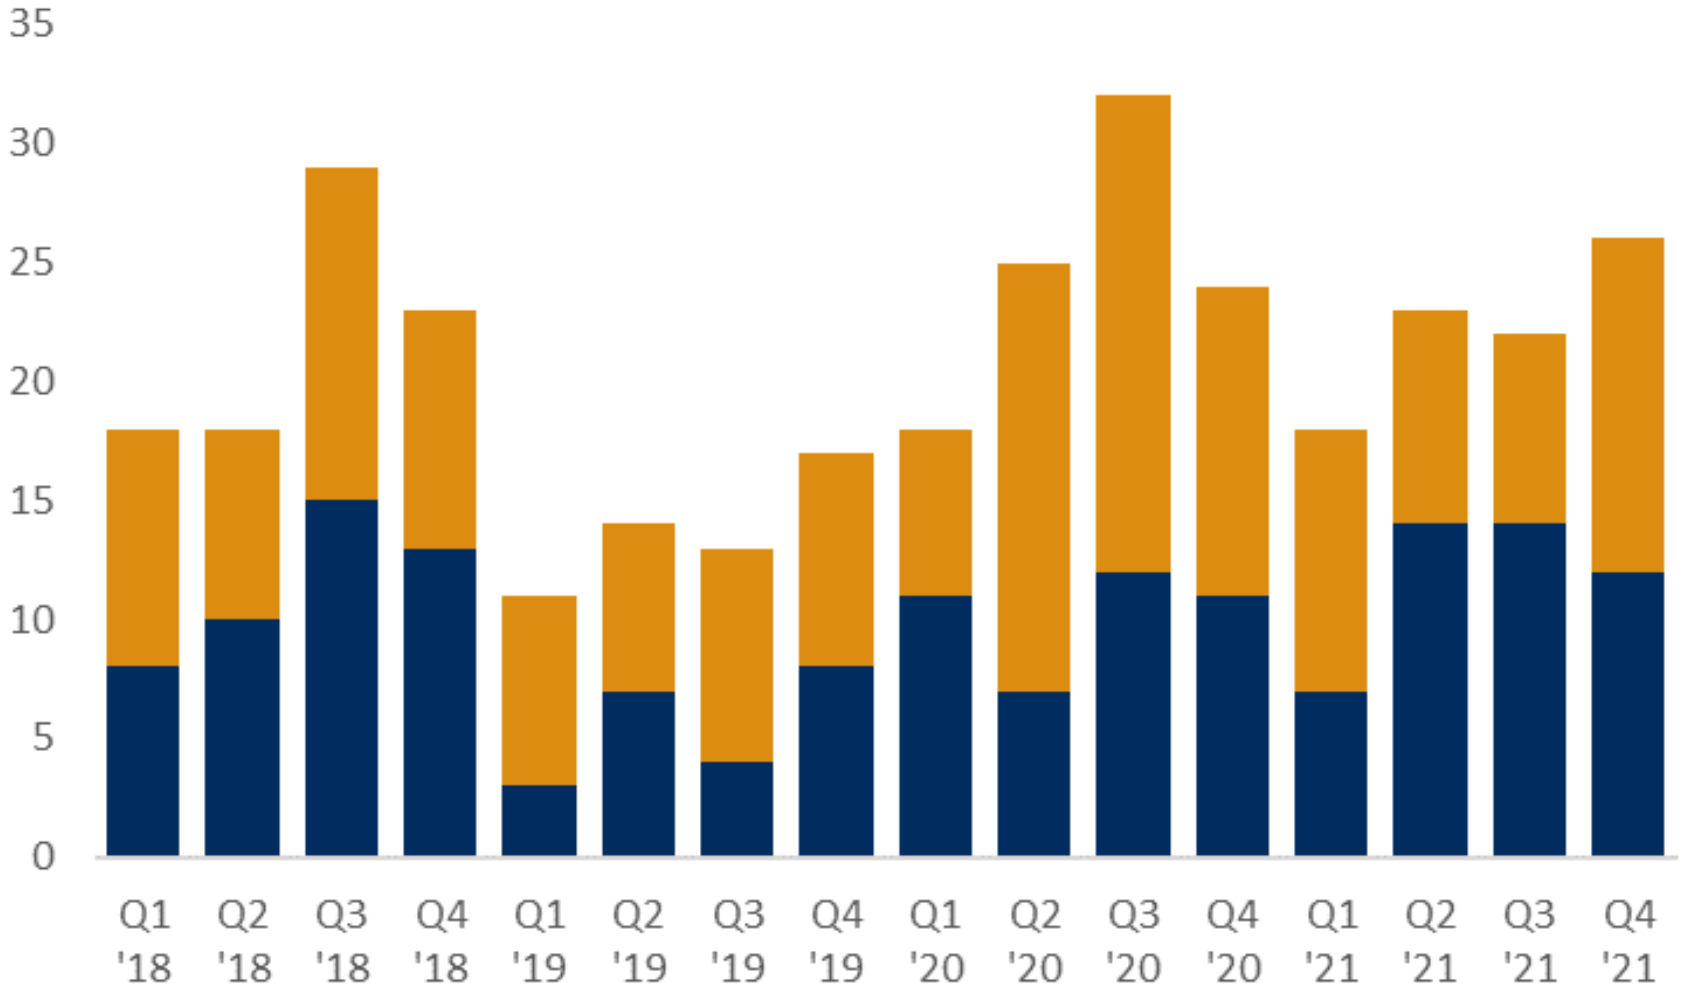
Source: Wisconsin Department of Health Services Vital Records; deaths among Dane County residents. Data from 2021 are provisional. Homicide excludes Negligent Manslaughter and homicides involving Law Enforcement.

Most firearm-related deaths in Dane County were **suicides**. There was no significant trend in either firearm-related **suicides** or **homicides**.



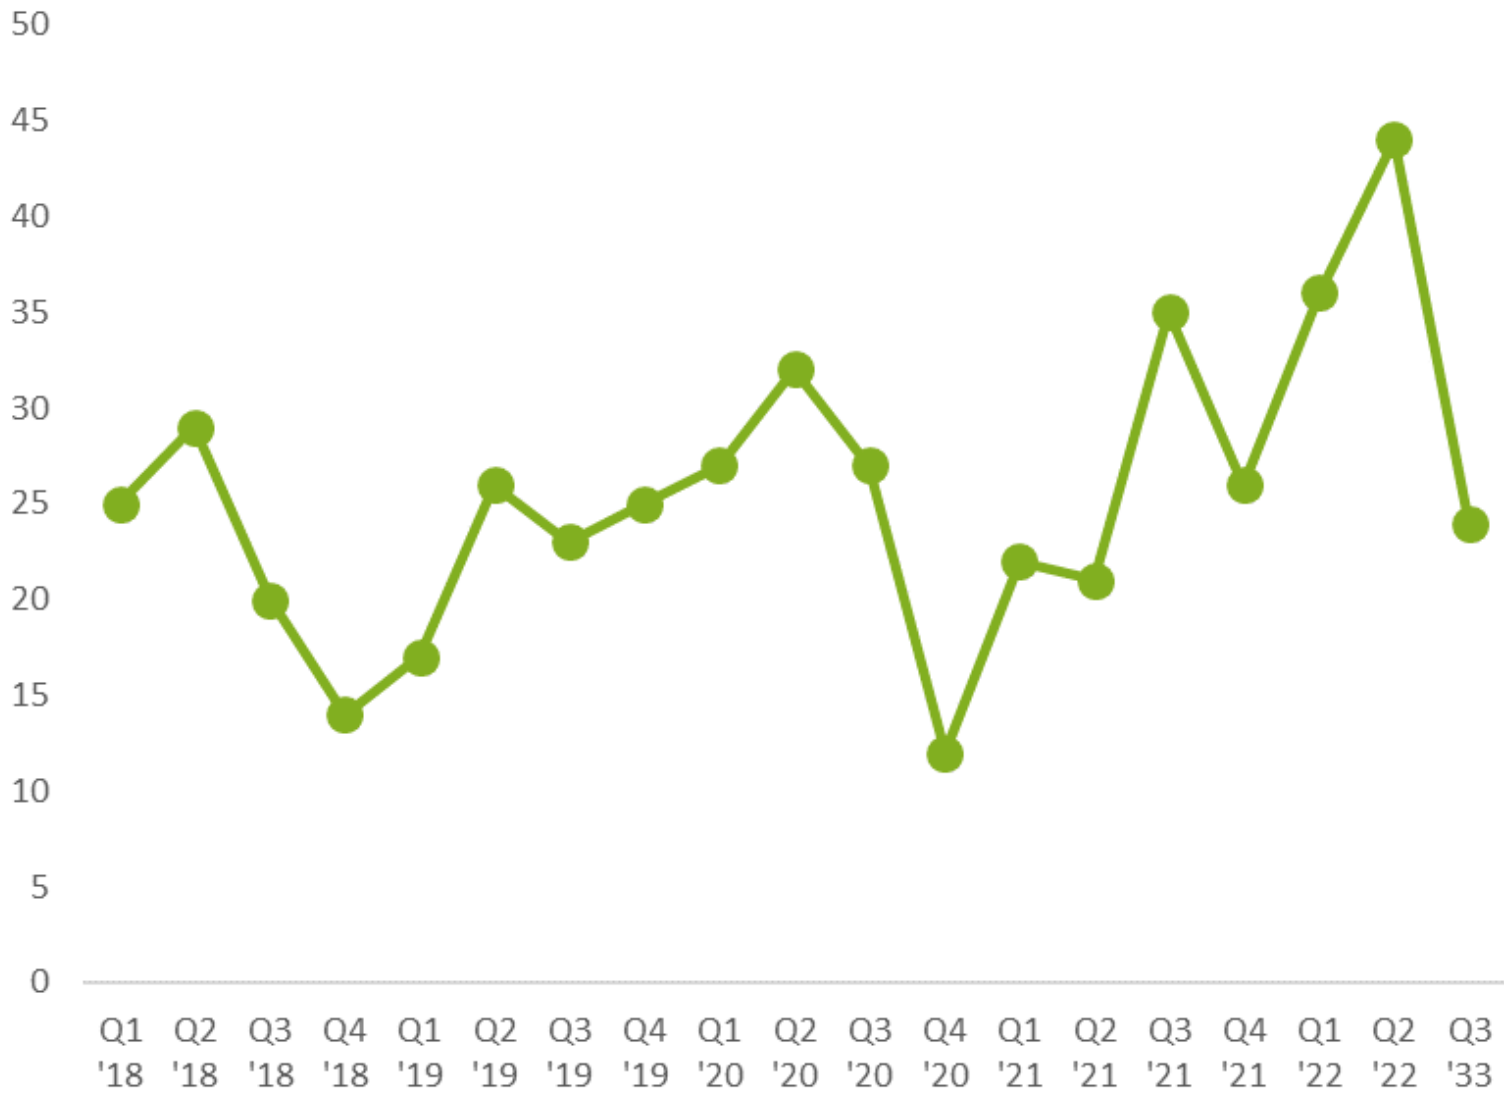
Source: Wisconsin Department of Health Services Vital Records; deaths among Dane County residents. Data from 2021 are provisional. Homicide excludes Negligent Manslaughter and homicides involving Law Enforcement

Total Firearm Injuries (**deaths** and **non-fatal emergency room visit and hospitalizations**) has increased since 2019



Source: Wisconsin Department of Health Services Vital Records and Wisconsin Hospital Association data. Deaths and hospital/ED visits among Dane County residents. Death data from 2021 are provisional.

Firearm violations in Madison have increased since 2018



Source: Madison Police Department. Data from 2022 are provisional and may change as offenses are further investigated. Some weapons violations could not be identified as firearm violations.

Data summary

1. Overall violent incidents in Madison have decreased since 2018, as have reported rape and robbery.
2. The number of homicides has increased in Dane County since 2018.
3. Firearm-related deaths in Dane County have not changed significantly since 2018.
4. The total firearm injury, considering deaths and non-fatal hospital/ER visits, has increased in Dane County since 2019.
5. Firearms violations, regardless of whether the firearm was used, have increased in Madison.

WISH Injury-Related Health Outcomes

Data queries

Select a dataset below to begin a query. These injury-related queries are based on injury-related datasets (please refer to the Technical Notes for further clarification).

Injury-related mortality (data from 1999 onward)

Injury-related emergency department visits (data from 2016 onward)

Injury-related hospitalizations (data from 2016 onward)

- (●) ALL injury deaths
- ( ) Assault-related death/homicide (ANY manner of assault)
- ( ) Drowning
- ( ) Firearms: ALL

  OR choose one of the following manners of firearm death (not inclusive of all manners):
  - ( ) Unintentional
  - ( ) Assault
  - ( ) Self-inflicted

- ( ) Poisoning: ALL

  OR choose one of the following:
  - ( ) Non-drug-related poisoning
  - ( ) Drug-related poisoning

- ( ) Suffocation
- ( ) Suicide: ALL

  OR choose one of the following methods of suicide (not inclusive of all methods):
  - ( ) Firearm
  - ( ) Poisoning
  - ( ) Suffocation
  - ( ) Cutting or piercing objects

- ( ) Traumatic Brain Injury (TBI): ALL

  OR choose one of the following manners of TBI injury death (not inclusive of all manners):
  - ( ) Unintentional fall-related TBI
  - ( ) Unintentional struck by or against someone or something TBI
  - ( ) Unintentional motor vehicle-related TBI
  - ( ) Assault-related TBI

- ( ) Unintentional fall-related deaths
- ( ) Unintentional fire-related deaths
- ( ) Unintentional Motor Vehicle (MV) death: ALL

Violent Crime Trends in Madison

January 2018—June 2022, Madison Police Department Data

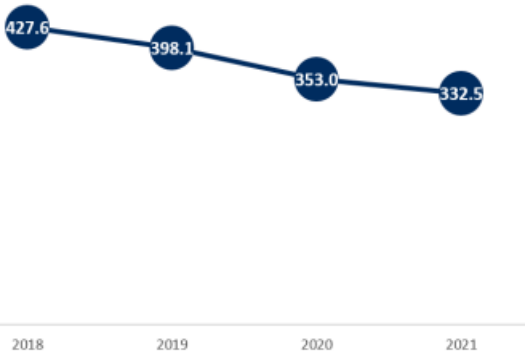
In this report, we show trends of various kinds of violent crime from the Madison Police Department. These numbers represent real people who have experienced trauma and harm. Regardless of trends, each incident is important and deserves recognition. No level of violence is acceptable in our communities.

There are a wide array of incidents that are classified as violent crimes by police departments. Violent crimes include homicides (murder), sexual assaults (rape), robberies, and aggravated assaults.

Violent crime as a whole has trended downwards in Madison over the past four years.

The violent crime offense rate decreased by 22% from 2018 to 2021, and was significantly lower in 2021 than in 2018 and 2019.

Quarterly violent crime rate per 100k, January 2018-June 2022



Annual violent crime rate per 100k, 2018-2021

Firearm Deaths in Dane County

September 2022

Firearm violence is a public health crisis.

On average, one Dane County resident dies every ten days from a firearm. These are preventable deaths that not only impact those directly involved, but contribute to longstanding ripple effects for the larger community. Firearm violence is a leading cause of premature death and requires a public health approach to prevent further death, disability, and trauma. We support evidence-based firearm safety policies in order to prevent gun violence in our community.

From 2016-2021, 77% of firearm deaths among people who live in Dane County were suicides, 22% were homicides, and 1% were of an unintentional or undetermined intent.

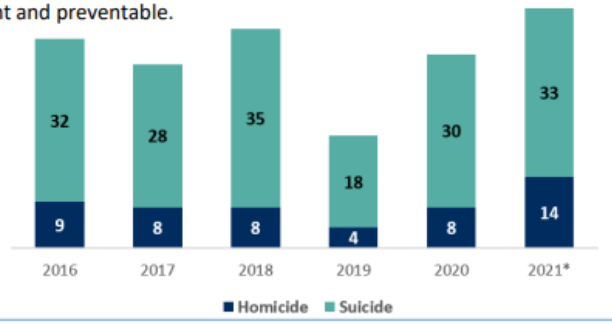
Manner of death for firearm deaths among Dane County residents, 2016-2021*

**2021 data is provisional*

The number of firearm deaths has been mostly stable for the past six years, except for a 51% statistically significant decrease from 2018 to 2019. There were fourteen Dane County residents who died by firearm homicide in 2021, which is the highest in recent history, although not significantly higher than any of the preceding five years. Regardless of trends, each firearm death is important and preventable.

Firearm suicide and homicide trends among Dane County residents, 2016-2021*

**2021 data is provisional*



Poll

What type of data is important to you?

Numbers/rates/trends of types of violence

Demographics of people impacted by violence

Neighborhood-level violence data

Neighborhood-level risk/protective factors

Dane County compared with other places

Data for cities outside of Madison

In which format do you prefer to see the data?

Snapshot

Brings data from multiple sources in one place

Time to Connect

Instructions

Please complete this poll

Review results of poll

We will be going into breakout rooms related to the topic you chose.

You will be in the rooms for 10 minutes

We will return to the main room after the breakout session and will ask that each group talk about their discussion

In your breakout rooms

Introduce yourself and your organization

What prompted you to make the selection you did?

What services does your organization provide that are related to the issue you chose?

What does your organization need support with?

Are there any ways the people in this group could support one another?

Report back

Support Community Engagement with Children, Youth, and Families

Bolster and Increase Intervention and Continuous Healing for Those Affected by Violence

Foster Strong Neighborhoods

Report back:
June Meeting Recommendations

- Build capacity for community leaders and organizers
- Build capacity to meet basic needs
- Strengthen neighborhood centers as resources for families

Strengthen referral systems and coordination

Build capacity for youth leaders

Community of practice

Zoom poll

What is one action I can take to continue working on the issue I identified?

What are some ways being part of this Coalition can support me and my organization?
